

# CDP's 2017 Supply Chain Climate Change Information Request for Small & Medium sized Enterprises (SMEs)

**More multinationals and their suppliers than ever before now use CDP to achieve sustainable supply chain management. Through CDP's Supply Chain program companies and their suppliers are managing the significant risk that climate change poses to the globalized supply chain model.**

**The following set of questions form CDP's 2017 Supply Chain Climate Change Information Request for Small & Medium sized Enterprises (SMEs). Companies are asked to answer these questions in the Online Response System (ORS) provided by CDP through its website. As such, this document is a representation of the request and whilst the questions will remain the same, the format may differ online particularly where drop down options and tables have been included for ease of response. Guidance is available on the CDP website from January 2017 which details all of the options available and provides screen shots of the ORS to aid companies in completing the request.**

We request a reply to the following questions by 31 July 2017.

Please respond to the information request using our Online Response System (ORS). In early April 2017, instructions on how to access the ORS will be sent to you by e-mail. If you are unable to respond via the ORS, please e-mail [respond@cdp.net](mailto:respond@cdp.net).

We encourage organizations to consult the CDP 2017 Reporting Guidance and CDP's 2017 Supply Chain Climate Change Scoring Methodology at [www.cdp.net/guidance](http://www.cdp.net/guidance), as well as to use the guidance within the ORS. Please answer the questions as comprehensively as possible. Where you do not have all of the information requested, please respond with what you have as this is more valuable to your customers than no response at all.

We encourage organizations to assess the relevance of questions in accordance with the principles of "The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)" developed by the World Resources Institute and the World Business Council for Sustainable Development ([www.ghgprotocol.org](http://www.ghgprotocol.org)). According to these principles, which are also set out in the CDP guidance, information is relevant if it contains the detail that users, both internal and external to the company, need for their decision-making.

Where questions have been amended from 2016 to 2017 this is indicated next to the relevant questions.
