
CDP Supplier Engagement Rating Methodology 2018

CDP Climate Change 2018

CDP 2018 Supplier Engagement Rating methodology

Introduction

The supplier engagement rating methodology provides a score which assesses supplier action as reported by a company's CDP response. The score assesses the level of detail and comprehensiveness of the content, as well as the company's awareness of climate change issues, management methods and progress towards action taken on climate change as reported in the response.

Essential reading

This methodology should be used in conjunction with the CDP climate change questionnaire guidance 2018, and the "Introduction to CDP scoring 2018" document, as well as the Supplier Engagement Rating Introduction. It is strongly recommended to familiarize yourself with the contents of both the 2018 guidance, the 2018 Scoring introduction document and the 2018 Supplier Engagement Rating document before using the scoring methodology. Please note that the "2018 Supplier Engagement Rating introduction" document contains information essential for the understanding and correct use of this scoring methodology.

Status of this methodology

This methodology is intended to provide guidance to companies on how their response will be scored. In common with other scoring processes of this type, we expect to make future adjustments in light of the application of the methodology to the responses received.

"CDP reserves the right to remove, amend or alter scoring criteria as displayed in the scoring methodology at any time during the disclosure cycle, without notice or notification. Such changes will only be made in exceptional circumstances when necessary to ensure that the methodology remains fair, impartial and effective for the purpose of assessing progress towards environmental stewardship."

Targets Scoring Notes

Please note that:

- Where an organization has both absolute and intensity targets, all targets will be scored and the question for which the score which has the most positive impact on the company's score will be recorded (either the question relating to an Absolute target or the question relating to an Intensity target).

- If a company does not have an Absolute or Intensity target in line with the criteria in this methodology, a Supplier Engagement target reported in C4.2.

(C4.1) Did you have an emissions target that was active in the reporting year? Response options
