Overview

Annual revisions and developments to our questionnaires reflect and drive best practice, improving both data quality and the disclosure experience. The 2022 water security questionnaire, including sector questions and the reporting guidance, can be viewed at www.cdp.net/en/guidance.

This document indicates what has changed for 2022.

- Part 1 lists key changes: new questions, removed questions, modifications to existing questions and the reporting guidance.
- Part 2 details where 2022 questions differ from the 2021 questionnaire – including minor changes.
- Part 3 sets out the structure of the 2022 questionnaire with a list of the modules and questions. It shows which questions form the minimum version of the questionnaire (for some smaller companies and some responding for the first time) and indicates the linkages between questions (where a response to one question impacts another).

Scale of 2022 changes – core questions

- More than 85% of the 2021 questions have either not changed or have just minor changes (excludes sector-specific and supply chain module questions).
- There are 3 core questions removed from the 2021 questionnaire, and 4 new questions. The total number of questions has risen by 1 to 71.
- The figure opposite shows the scale of change within each module.

Changes to sector-specific questions

- There are no new or modified sector-specific questions.
