SA see another response, included under parent company

Since the introduction of the ESG Reporting Guide in 2012, we have seen increased recognition amongst our listed companies of the importance of environmental, social governance (ESG) performance and reporting. Our ESG Reporting Guide provides a starting point for listed companies with limited familiarity with ESG reporting. We encourage listed companies who are capable of doing so to adopt internationally recognised guidelines such as the one provided by CDP. CDP's system provides a key tool for companies as they prepare to further develop their climate change reporting.
