

UK Spring Workshop 2019

Breakout sessions

Time	Presentation Suite	Ante Room	Room 1	Room 2
13:00	Disclosing to climate change in 2019? Everything you need to know.			Data to drive decisions in cities: How the SCATTER tool has been used by Greater Manchester
13:45	Move rooms			
13:55	Stepping up to a 1.5C° world: defining corporate leadership with science-based targets and the RE100, EV100 & EP100 initiatives	Understanding CDP's Supplier Engagement Rating (SER) & learn from SER Leaders Lego & BT how they achieved their A.	Disclosing to water in 2019? Everything you need to know	CDP's Financials Sector Questionnaire development in discussion
14:40	Coffee Break			
15:00	Integrating environmental disclosure into your mainstream report	Walking through the Forests questionnaire	Water is everyone's business. How to enhance resilience and reduce risk	Hear from the GLA, Siemens & Landsec about catalyzing City and Corporate collaboration
15:45	Move Rooms			
15:55	Accredited Solutions Providers: Knowledge Hub	How do investors and customers use data? Vodafone, KPMG and Invesco share how they use your CDP disclosures.	Discuss with CDP and Tesco how manufacturers and retailers can overcome challenges in implementing responsible sourcing strategies?	Corporate Reporting Dialogue Roundtable

More information on the content of each breakout session is below. We will be asking you to register for the sessions you are interested in closer to the event date.

13:00 Slot One

Disclosing to climate change in 2019? Everything you need to know

Whether you've responded before or this will be your first year, join this session for a question by question overview of the 2019 questionnaire and how to make the most out of your response.

Data to drive decisions in cities: How the SCATTER tool has been used by Greater Manchester *With Greater Manchester, CDP Cities team, Tyndall Centre and Anthesis*

- ▼ Hear from consultancy Anthesis, on how to create a city-wide inventory, and an emissions reduction target using their Scatter tool
- ▼ Discuss the importance of measuring and monitoring at a city-wide scale
- ▼ Examples of best practice from cities already assessing their emissions and, environmental impact and risks

Expert Speakers:

Samuel Evans, Head of Environmental Policy, **Greater Manchester**

Polly Stebbings, Consultant, **Anthesis**

Dr Jaise Kuriakose, Lecturer in Energy and Climate Change, **Tyndall Centre for Climate Change Research**

13:55 Slot Two

Stepping up to a 1.5C° world: defining corporate leadership with science-based targets and the RE100, EV100 & EP100 initiatives

Join CDP's Climate & Commit to Action teams for an overview of the IPCC's Special 1.5°C Report and how it is redefining corporate climate leadership. We will cover the latest insights and best practices in science-based target setting (SBTs) as well as how climate leadership initiatives, such as RE100 (100% renewable energy), EP100 (smart energy use) and EV100 (electrical vehicle uptake), help to future-proof your business growth and guide your strategy on the path to a 1.5°C-aligned world.

Supply Chain: Understanding CDP's Supplier Engagement Rating (SER)

An organization's average upstream emissions are around 5.5 times greater than their direct operations. Because of this, organizations have much greater potential to reduce global emissions by influencing their supply chains. The Supplier Engagement Rating provides a score for how effectively companies are engaging their suppliers on climate change, if you disclose your climate information to customers or investors you will receive a SER rating this year. Please join this session to find out more about the SER and the methodology in 2019 & hear from companies who made it to the SER Leaderboard last year, **Lego and BT**. They will be discussing how supplier engagement fits as part of their strategy.

Corporate Panelists:

Gabrielle Giner, Head of Environmental Sustainability, BT

Andrew McMullen Environmental Supply Chain Senior Manager, LEGO Group

Disclosing to water in 2019? Everything you need to know

Whether you've responded before or this will be your first year, join this session for a question by question overview of the 2019 questionnaire and make the most out of your response.

CDP's Financials Sector Questionnaire development in discussion

Hear from our technical colleagues on how CDP's platform is evolving for the financial sector, for 2019 and beyond. Learn about the new developments and join a discussion with industry peers on how TCFD is changing the way financial sector organisations are disclosing.

15:00 Slot Three

Integrating environmental disclosure into your mainstream report

With the Climate Disclosure Standards Board

After the first year of reporting against the Task Force on Climate-related Financial Disclosures (TCFD) recommendations and the EU Non-financial Reporting Directive (NFRD), companies are starting to place material environmental information in their mainstream report.

In this workshop, you will learn:

- ▼ How companies are reporting including examples of businesses who are successfully disclosing environmental and climate-related risks and opportunities;
- ▼ Best practice for TCFD-aligned disclosures into your management reports; and Practical assistance for companies looking to improve their reporting.

Walking through the Forests questionnaire

In this session, CDP Forests Technical team will present the Forests reporting framework and how companies can leverage it to address their exposure to forests-related risks and report on their progress. This is a session for companies at the early stages of their journey.

Contents:

- ▼ Intro to the forest's questionnaire
- ▼ Key modules and rationales
- ▼ Avoiding pitfalls (e.g. select a commodity)
- ▼ Recent developments and what's in the pipeline
Where to find information

Water is everyone's business. How to enhance resilience and reduce risk

From governance to supply chain engagement, join this session to explore how your company can enhance resilience against water issues.

Catalyzing City and Corporate Collaboration

- ▼ Discuss how cities and corporates can take collective action.
- ▼ GLA will present how they have worked on the London Business Climate Leaders initiative to help accelerate action to meet their zero carbon 2050 plan
- ▼ Examine lessons learned from this pilot and what companies and cities could learn

Panelists:

Jazmin Burgess, Principal Policy and Programmes Officer, **Greater London Authority**

Brendan Rouse, Sustainability Manager, **Landsec**

Mark Jenkinson Head of AMO Cities & City Director London, **Siemens**

15:55 Slot Four

Accredited Solutions Providers: Knowledge Hub

Come and meet CDP's UK-based [Accredited Solutions Providers](#). Our partners cover all your sustainability needs, from renewable energy to science-based targets, data collection to verification, and more. They help CDP responding companies to disclose, take action and improve their sustainability strategies.

The knowledge hub is split into 15-minute slots allowing you time to meet the solutions providers that can address your specific challenges and ambitions.

Below is a list of the different topics that will be covered in the knowledge hub:

EcoAct: Science-based targets – Five things to consider for a robust 1.5degree scenario roadmap

Ecometrica: Combining sustainability and mapping for a more complete reporting picture

Bureau Veritas: Why do you need to embed sustainability into your supply chain?

UL: Reporting – Automation & Supporting Business Transformation

Schneider Electric: Maximizing Opportunities with Sustainability Data & Insights

Carbon Credentials: Tackling scope 3 for science-based targets

Greenstone: Leveraging CDP data through framework mapping

Lucideon: “Getting it wrong” - top 5 CDP reporting issues picked up at verification

Thinkstep: Supply chain footprinting - getting it right

WSP: Streamlined Energy and Carbon Reporting (SECR) – Are you ready for the change?

Accuvio: Streamlining your sustainability reporting and saving time

How can manufacturers and retailers overcome challenges in implementing responsible sourcing strategies?

Manufacturers and retailers are faced with several challenges in addressing forests-related risks in their supply chains such as lack of data and transparency. During this interactive session, you can hear from Tesco on their strategy around Forests, and CDP will present existing solutions and tools. Companies will be asked to discuss further measures that would improve their ability to manage forests-related risks.

Corporate Speaker: **Daniel Salter**, Group Responsible Sourcing Manager (Forests), **Tesco**

Corporate Reporting Dialogue Roundtable

As a participant of the Corporate Reporting Dialogue, CDP is committed to better alignment in the corporate reporting landscape wherever possible and to improving the integration of non-financial and financial information.

This roundtable is part of the global stakeholder consultation for the CRD's Better Alignment Project's – details can be found on www.corporatereportingdialogue.com. To help focus the project, join this roundtable if you have insights to share on any of the following:

- how effectively the ESG reporting frameworks you use work together;
- how any differences might be inhibiting effective reporting, and;
- any improvements in alignment you would like to see.

Investor and Supply Chain: How do investors and customers use CDP data?

Companies are asked to respond to CDP on behalf of investors and customers who want to understand more about the corporate climate, forest and water strategies of the companies they work with, invest in and buy from. **Invesco, Vodafone and KPMG** will be joining a panel to talk to you about why they want companies to disclose their information through CDP? How they used this (and other environmental) data in the past? What are their ambitions going forward?

Investor and Corporate Speakers:

Maria Lombardo, Head of Responsible Investment, EMEA, **Invesco**

Andrew Murray PIEMA, Environmental Analyst, Sustainable Business at **Vodafone Group**

Sarah Benson, Environment Manager Corporate Responsibility, **KPMG LLP**
