Guidance & questionnaires

We understand that disclosing through CDP, whether for the first time or as an experienced responder, takes time and requires support. CDP offers this support, to [cities](#) and [companies](#), on every step of the disclosing journey through guidance documentation, [live webinars and workshops](#).

CDP's guidance documents provide an overview of question pathways as well as details on what information to provide. Once you have registered and activated your questionnaire we can guide you on the format required and where to find tools or further information to construct your answers.

CDP 回答スコアリング手法

CDP scoring methodologies 2019

CDP uses the scoring methodologies to incentivize companies to measure and manage environmental impacts through participation in CDP's climate change, forests, and water security questionnaires. Each of CDP's questionnaires has an individual scoring methodology.

Maintaining CDP's reputation as an independent and unbiased provider of high quality information is of paramount importance. [Read our policy on conflicts of interest for more information.](#)

The scoring of CDP's questionnaires is conducted by accredited scoring partners trained by CDP. CDP's internal scoring team coordinate and collate all scores and run data quality checks and quality assurance processes to ensure that scoring standards are aligned between samples and scoring partners.

W4. Risks and opportunities

- Providing information about inherent risk exposure rather than residual risk allows data-users to consider the potential impact and the appropriateness of the organization's response.
- CDP asks about risks anywhere in your business that are substantive at the corporate level (not those that are significant only at the facility level, for example). We wish only to know about risks that have the ability to impact the business, financially, strategically or otherwise, at the corporate level.

W4.1

(W4.1) Have you identified any inherent water-related risks with the potential to have a substantive financial or strategic impact on your business? 

Yes, only in our value chain beyond our direct operations

[Clear selection](#)

Your response to W4.1 will determine which subsequent questions are presented. If your response to W4.1 is amended, data in those dependent questions may be erased. In this case, be sure to re-enter data for all relevant questions. The guidance for each question indicates if it is a dependent question

SC. Supply chain module

- The SC module is for companies responding to the CDP climate change questionnaire at the request of one or more customers, who are members of CDP's supply chain program. This module has been developed following consultation with both suppliers and the member companies that are their customers. It provides further context to buyers regarding the procedures adopted and/or actions taken by their suppliers.
- Organizations benefit from disclosing by increasing transparency and engaging with their buyers to further develop their sustainability. The information disclosed here builds on information that CDP supply chain members are particularly interested in elsewhere in the climate change questionnaire.
- Emissions located in the supply chain are around four times as high as those from direct operations. To meet the goals of the Paris Agreement, action at every level of the supply chain is needed.
- Please note that your response to the SC module is not scored.
