

CARBONSINK

For 6 years your partner for improving your climate strategy

Since 2017, Carbonsink is CDP Silver Climate Change Consultancy Solutions Providers. We help Italian companies take effective climate action and support them in their decarbonization journey thanks to an important range of services on the main issues related to sustainability.

CDP questionnaires help the private sector to communicate its climate strategies in a transparent manner and to compare itself with companies in certain sectors, also on an international level.

- 2 SECTOR-SPECIFIC ANALYSES**
- 3 COMMUNICATION SUPPORT**
- 4 ENHANCING CORPORATE STRATEGY**
- 5 COMPANY SCORE IMPROVEMENT**

CASE STUDY

CDP A List – Carbonsink supported Sofidel in filling two CDP questionnaires 2020: the 'Climate Change' questionnaire where Sofidel achieved the highest rating and the 'Forest' questionnaire where the company was recognised for its leadership in the fight against deforestation with an "A-" score.

"Documenting and making public the impact of the sustainability policies we put in place is crucial for Sofidel. All the more so today, in a context in which the entire world's attention is focused on the ecological transition and the market - investor, costumers, and consumers – are increasingly demanding clarity, transparency, and the sharing of information and data. In its growing commitment to sustainability reporting, Sofidel has found an important and reliable partner in Carbonsink, particularly about the CDP reporting system".

- Riccardo Balducci
Energy & Environment Director Sofidel

The renewal of Carbonsink as a CDP accredited solution provider for climate change and SBT services in Italy is a sign of the commitment and expertise of the Carbonsink team in addressing these important issues. They are confirmed as a key solution provider to support Italian businesses in developing climate strategies in line with science and addressing the challenges and opportunities related to climate change»

- Paul Robins, CDP Head of Partnership
