Q & A
Overview Of 2022 Climate Change Disclosure

Ms. Elizabeth Lo
Senior Corporate Engagement officer, Southeast Asia
Growing momentum of disclosures across most countries in the region
Growing momentum for regulatory environmental disclosure with a focus on climate change in Southeast Asia. However, Forest and Water-themed disclosures are lagging.
More needs to be done on emissions reporting

Scope 3 represents a large proportion of emissions but is severely lagging

- **68%** reported Scope 1 emissions
- **52%** reported Scope 2 emissions
- **29%** reported at least one category of Scope 3 emissions
Supply chain engagement still not regarded as a ‘need to have’ in Southeast Asia

Environmental impacts of the supply chain remain significantly underestimated by Southeast Asian companies

(C3.5) In your organization’s financial accounting, do you identify spending/revenue that is aligned with your organization’s climate transition?

**MODIFIED QUESTION**

Question text has been revised to indicate if you identify the alignment of your spending/revenue with your climate transition plan, a sustainable finance taxonomy, or both. The response options have been reformatted into a table to drive the new taxonomy questions, C3.5b and c.

Due to the addition of datapoints related to sustainable finance taxonomies in this section, C3.5 is no longer only shown to organizations who have indicated that they have a climate transition plan in C3.1

(C3.5b) Quantify the percentage share of your spending/revenue that was associated with eligible and aligned activities under the sustainable finance taxonomy in the reporting year.

Asks about the share of spending and revenue aligned with sustainable finance taxonomies at the activity level.

This allows companies to provide evidence of the extent to which their spending and revenue is directed at/derived from activities defined as sustainable by a sustainable finance taxonomy.

NEW QUESTION

---

C5-23 repeat for each financial metric
Requests additional contextual information relevant to taxonomy alignment. This helps CDP data users interpret the information companies provide on the alignment of their spending/revenue with a sustainable finance taxonomy. MODIFIED SCORING

Management scoring criteria
Full Awareness points must be awarded to be eligible for Management points

Sum of figures provided in column 'Total fuel MWh consumed by the organization' in both rows 'Sustainable biomass' AND 'Other renewable fuels (e.g. renewable hydrogen)' accounts for 30% or more of column 'Total fuel MWh consumed by the organization' in row 'Total fuel' – 0.25 points

Leadership scoring criteria
Full Management points must be awarded to be eligible for Leadership points

Sum of figures provided in column 'Total fuel MWh consumed by the organization' in both rows 'Sustainable biomass' AND 'Other renewable fuels (e.g. renewable hydrogen)' accounts for 70% or more of column 'Total fuel MWh consumed by the organization' in row 'Total fuel' – 0.25 points

Leadership now scored – asks for 70% of fuel consumed to be sustainable biomass or other renewable fuels. For chemicals companies this is raised to 75% in line with ACT thresholds.

Percentage required for proportion of fuel that is sustainable biomass or other renewable fuels increased from 10% to 30%.
