of our new clients [improved](#) their score in 2023.

Our Services

Identify Gaps

By conducting a gap analysis of your previous response, CEMAsys helps you identify where you lost points and determine focus areas for closing gaps and improving strategy.

Fulfill your Potential

By analyzing your current response drafts, CEMAsys helps you recognize your reporting potential and assist in improving the response to increase points and maximize potential.

Support from A-Z

By offering support throughout the reporting cycle, CEMAsys can ensure you get the most out of your CDP response, so you can feel confident when submitting your response.

“CDP has longstanding experience with CEMAsys as a CDP Silver climate change and SBT consultancy partner. Their services and expertise help companies to develop credible strategies for transforming their business models to align with a 1.5°C, net-zero economy”.

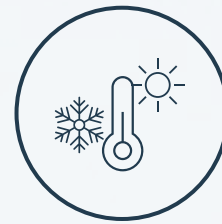

Alberto Carrillo Pineda – Director Science Based Targets, CDP

CEMA_{sys} provides CDP-related services to help maximize your CDP score

Carbon Accounting

We have software solutions and consulting expertise to help you calculate your Scope 1, 2, and 3 emissions. These are aligned with all best practice standards and frameworks: The GHG Protocol, CDP, TCFD & SBTi.

Climate-related risks & opportunities

CEMA_{sys} has extensive experience helping companies identify and mitigate climate risks aligned with the recommended TCFD framework. In addition, we have one-of-a-kind tool for scenario analysis.

Science-Based Targets

As an SBTi-accredited partner since 2017, CEMA_{sys} can help you set science-based emissions reductions targets and help you submit them to the Science Based Targets initiative (SBTi) for approval.

Strategy Development

Our expert consultants are up to date on all best practices and can help your company develop a robust strategy based on the most updated standards and frameworks to help you stay ahead of competition and compliance.
