About CDP

companies, cities, states and regions to measure and manage their environmental impacts.

Data drives our mission.

Through our work, we have built the world's most comprehensive collection of self-reported environmental data.

CDP data facilitates
environmental action
globally with granular insights,
year-on-year tracking, and
trusted benchmarks.

Over 330+ major buyers, with a combined purchasing power of over US\$6.4 trillion, are asking their suppliers to disclose through the CDP Supply Chain program.

Over **700+ investors**, with assets of US\$142+ trillion, are requesting companies to disclose through CDP.

We host **global events** and **webinars** with thought leaders in the field.

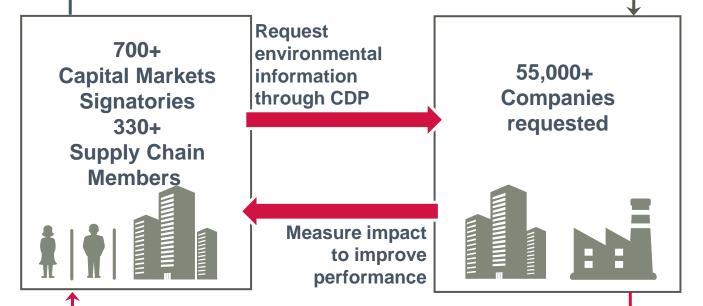

We are founding partners of the **Science Based Targets Initiative**.

Through our offices and partners in 50 countries we have driven unprecedented levels of environmental disclosure.

How CDP Works

Investors and purchasing companies use CDP to make informed decisions, reward companies with enhanced transparency and drive action.

Companies and suppliers provide data on environmental impacts, risks, opportunities, investments and strategies.

Companies take action to tackle climate change, prevent the destruction of forests, safeguard water resources, reduce plastic pollution and protect biodiversity.

A single corporate questionnaire

This will also ensure that global capital markets, procurement teams and the data ecosystem that relies on CDP have the most robust, decision-useful environmental data.

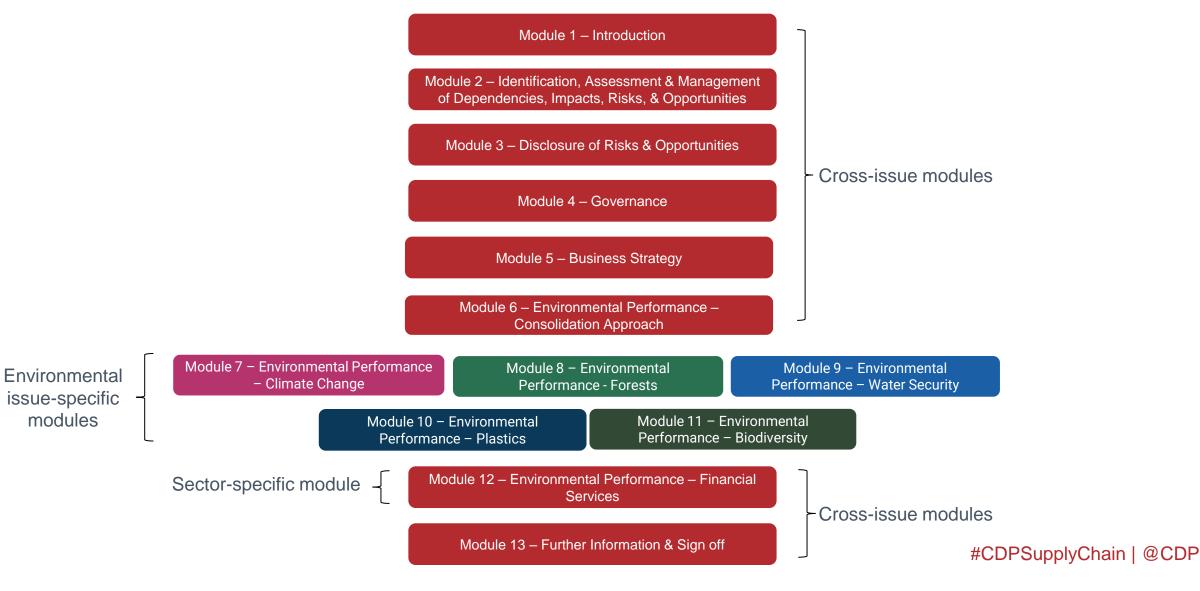

■ By streamlining reporting, we'll ask the right questions, to the right organizations, in the right way without duplication.

Tips for Best Practice Reporting

- Avoid blank cells, errors, and inconsistencies
- Go through the questionnaire with the scoring methodology and reporting guidance to ensure you meet all possible criteria for each question
- ▼ For qualitative responses, provide clear explanations, rationales, company specific responses
- Review peer companies' CDP responses (publicly disclosing companies)
- Identify and designate teammates for stakeholder outreach and questionnaire response

Example of company specific response:

C2.3a - Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.

• A 'unique' company specific description in column 'Company specific description' – 1 point

Poor response – 0 points	Average response – 0 points	Good response – 1 point
Rising mean temperatures have the potential to negatively affect our operations.	Due to a rise in mean temperatures, there is a risk that the energy consumption needed for air conditioning and refrigeration will increase, leading to an increase in costs. There is a particular risk of energy consumption increasing at our shops, offices, and distribution centers.	60% of our plants are located in central America, an area that has been identified as likely being subject to large increases in mean temperatures. Such increases in temperature may lead to an increase in the energy consumption required for air conditioning and refrigeration to remain effective. This will lead to increased operational costs across our business.

Frequently Asked Questions

Cost and Confidentiality

- **▼** Do I need to pay to respond to the CDP questionnaire?
 - In 2024, suppliers do not need to pay a fee to respond to a request(s) from ONLY Customer(s).
- I'm concerned about data protection and confidentiality
 - Data and information reported in Supply Chain questions are assigned specifically to the requesting company. No other company has access to that information.
 - Supplier scores are never publicly shared regardless of public/non-public submissions if only responding to customer request(s).
 - CDP North America is GDPR and CCPA compliant.
 - Our terms & conditions for the questionnaires can be found at CDP.net/guidance

Frequently Asked Questions

DUNS numbers

■ Do I need a DUNS number to disclose to CDP?

Yes, all companies in the CDP database will be identified by a DUNS number. A DUNS number, or Data Universal Numbering System number, is a unique nine-digit identifier assigned to businesses by Dun & Bradstreet, a global data provider. Introducing a unique identifier to our CDP database facilitates efficient, scalable data management. The Dun & Bradstreet database contains over 500 million companies.

▼ How can I find my DUNS number?

■ If you do not know your DUNS number, you can get one by <u>registering with Dun & Bradstreet</u>. You can also access your DUNS number through the organization details page of the CDP website.

■ Is there a fee to get a DUNS?

■ There is no cost to request and receive a DUNS number. However, you can pay a small fee to speed up the process and receive your number more quickly. If you have purchased an expedited DUNS service, you can get your number within eight business days.

▼ Where can I find guidance on DUNS?

▼ Find more information about DUNS numbers here.

Frequently Asked Questions

Questionnaire

- **▼** What if I'm a small business and cannot complete the full questionnaire?
 - All companies with a revenue of less than \$50 million and less than 500 employees will be directed to answer the SME questionnaire. If you are a company with an annual revenue of less than \$250 million and less than 1000 employees, you can opt to complete the SME questionnaire.
- **▼** What if I'm based in a non-English speaking country? Can CDP still support me?
 - ▼ CDP has global staff willing to help suppliers understand the CDP information request. To request local support or learn about workshops and webinars in a particular country, you should use the online multilingual Help Center.
 - ▼ CDP also produces multiple guidance documents to support suppliers completing the questionnaire.
- **▼** Where can I find questionnaire guidance?
